Experience

UX/UI Designer

Lead Pronto

August 2020 – Present

Led A/B and MVT testing, informed by detailed analytics and metric-based design.

Increased lead generation on client sites by as much as 40% through considered use of data and analytics to make appropriate design and user improvements.

Undertook several individual projects as well as in conjunction with a small team, displaying the self-motivation and time management to be able to work effectively as an individual but also developing solid communication skills as part of a group.

Working closely with developers to create briefs and dev-friendly files for hand-off, maintaining contact and continuing to assist throughout a project's life cycle.

Freelance Digital Designer

Self Employed

May 2018 – August 2020

Pitched concepts and managed stakeholder expectations, providing clear plans and time scales and maintaining close contact throughout each instruction.

Highlights include:

- Working on numerous concept apps, from mockups right through the design process to create interactive prototypes for user testing.
- Working with an independent brewery to create their full suite of branding, from product labels, advertising, to merchandise.
- Working with larger clients to design to design additional products and

Graphic Designer (Internship)

DayDream Design

July – October 2019

Worked with the lead designer to design numerous projects, including; Websites, flyers, packaging and branding of companies

Helped to pitch ideas to clients and worked with them to resolve any issues with the design to make it fit for purpose
